

PHYSICS

About this subject area

College of Business & Technology Faculty (<https://spu.edu/academics/college-business-technology/faculty-staff?d=Technology>)

College of Business & Technology Website (<https://spu.edu/academics/college-business-technology>)

When you minor in Physics, you study the changes, interactions, and properties of matter and energy. As a result, you learn how physics strongly influences humankind's understanding of nature and how engineers create new technology based on the principles first discovered by physicists, contributing to the social economics and changes.

The Physics faculty are dedicated to educating and preparing students for a variety of careers in science, education, engineering, and business. We seek to provide a broad program of studies in theoretical and applied physics informed by a Christian worldview, graduating students who are equipped for continued graduate study, professional careers, and service.

Our Mission

The Physics faculty at Seattle Pacific University seek to prepare our students to use the history and ideas of physics and their analytical, computational, and research skills to engage the culture, the Creation, their minds, and the minds of others.

Minors
